

## Support S. 4042/H.R. 2654 in the Best Interest of Patients

ACA seeks parity for chiropractors in Medicare so they may provide all covered services allowed under their state licensure.

- Medicare currently limits the services DCs are allowed provide or order for their patients. This limitation has persisted for nearly 50 years with no scientific or valid policy basis.
- DCs are currently not allowed to furnish existing covered Medicare services that fall within their scopes of practice to their patients. This artificial limitation restricts chiropractors from providing their patients a continuity of care as they age into Medicare.
- Medicare serves more than 55 million Americans - Medicare parity is a true bipartisan effort.
- Patients are being driven away from chiropractic's non-drug treatments and toward prescription medication.

Chiropractors, chiropractic students, and importantly, patients can contact their federal representative and urge them to cosponsor S. 4042/H.R. 2654. **Contact your representative and get more information at [www.HR2654.org](http://www.HR2654.org).**
